carbohydrates high blood pressure ?dizziness In some cases, acupuncture points correlate to a specific anatomical point or structure. For example, the L13 point called Sanjian is on the radial (wrist) side of the index finger next to the head of the metacarpal bone. In other cases, the acupuncture point is found by measuring from an anatomical landmark such as a joint or other structure.

Vivien Shaw , Bangor University and Isabelle Catherine Winder , Bangor University

Anatomy – News, Research and Analysis - The Conversation According to the International Diabetes Federation Atlas from 2017, even 16.2% of pregnant women experience these disorders. The vast majority of 75–90% are gestational diabetes [ 38 ]. The data available on the effects of carbohydrate disorders on fetal development provides contradictory information.
