The Victorians, perhaps more than any Britons before them, were diggers and sifters of the past. Though they were not the first to be fascinated by history, the intensity and range of their preoccupations with the past were unprecedented and of lasting importance. The Victorians paved the way for our modern disciplines, discovered the
primeval monsters we now call the dinosaurs, and built many of Britain’s most important national museums and galleries. To a large degree, they created the perceptual frameworks through which we continue to understand the past. Out of their discoveries, new histories emerged, giving rise to fresh debates, while seemingly well-known histories were thrown into confusion by novel tools and methods of scrutiny. If in the eighteenth century the study of the past had been the province of a handful of elites, new technologies and economic development in the nineteenth century meant that the past, in all its brilliant detail, was for the first time the property of the many, not the few. Time Travelers is a book about the myriad ways in which Victorians approached the past, offering a vivid picture of the Victorian world and its historical obsessions.

Global Human Smuggling The relations between behavior, evolution, and culture have been a subject of vigorous debate since the publication of Darwin's The Descent of Man (1871). The latest volume of Perspectives in Ethology brings anthropologists, ethologists, psychologists, and evolutionary theorists together to reexamine this important relation. With two exceptions (the essays by Brown and Eldredge), all of the present essays were originally presented at the Fifth Biannual Symposium on the Science of Behavior held in Guadalajara, Mexico, in February 1998. The volume opens with the problem of the origins of culture, tackled from two different viewpoints by Richerson and Boyd, and Lancaster, Kaplan, Hill, and Hurtado, respectively. Richerson and Boyd analyze the possible relations between climatic change in the Pleistocene and the evolution of social learning, evaluating the boundary conditions under which social learning could increase fitness and contribute to culture. Lancaster, Kaplan, Hill, and Hurtado examine how a shift in the diet of the genus Homo toward difficult-to-acquire food could have determined (or co-evolved with) unique features of the human life cycle. These two essays illustrate how techniques that range from computer modeling to comparative behavioral analysis, and that make use of a wide range of data, can be used for drawing inferences about past selection pressures. As culture evolves, it must somehow find its place within (and also affect) a complex hierarchy of behavioral and biological factors.
Care in the Past: The Context of Cognition: Emerging Perspectives, Volume 75 in the Psychology of Learning and Motivation series, features empirical and theoretical contributions in cognitive and experimental psychology, ranging from classical and instrumental conditioning, to complex learning and problem-solving. Presents the latest information in the highly regarded Psychology of Learning and Motivation series. Provides an essential reference for researchers and academics in cognitive science. Contains information relevant to both applied concerns and basic research.

The Wiley International Handbook of History Teaching and Learning This book provides deeper understanding of the aging process, of the likely differences between the lives of past and future generations, and of the potential for optimizing these future lives from cross-cultural and cross-temporal perspectives.

Going Forward by Looking Back The most pedagogically innovative brief text—now connecting western civilizations to broader global contexts and students' own experiences.

Perspectives on Oceans Past Marine environmental history analyses the changing relationships between human societies and marine natural resources over time. This is the first book which deals in a systematic way with the theoretical backgrounds of this discipline. Major theories and methods are introduced by leading scholars of the field. The book seeks to encapsulate some of the major novelties of this fascinating new discipline and its contribution to the management, conservation and restoration of marine and coastal ecosystems as well as the cultural heritages of coastal communities in different parts of the world.

Wastewater Treatment and Reuse – Present and Future Perspectives in Technological Developments and Management Issues In recent years geometry seems to have lost large parts of its former central position in mathematics teaching in most countries. However, new trends have begun to counteract this tendency. There is an increasing awareness that geometry plays a key role in mathematics and learning mathematics. Although geometry has been eclipsed in
the mathematics curriculum, research in geometry has blossomed as new ideas have arisen from inside mathematics and other disciplines, including computer science. Due to reassessment of the role of geometry, mathematics educators and mathematicians face new challenges. In the present ICMI study, the whole spectrum of teaching and learning of geometry is analysed. Experts from all over the world took part in this study, which was conducted on the basis of recent international research, case studies, and reports on actual school practice. This book will be of particular interest to mathematics educators and mathematicians who are involved in the teaching of geometry at all educational levels, as well as to researchers in mathematics education.

Western Civilizations Used by more than a million students since its original publication, Western Civilizations became the leading text for the course by combining historical scholarship with classroom innovation. Master scholars/teachers Joshua Cole and Carol Symes enhance coverage of the West in a global context with a new focus on migration and nationalism. Dynamic digital resources, including award-winning InQuizitive activities and new History Skills Tutorials for every chapter, guide students from basic understanding basics to analysis and interpretation.

Critical Perspectives on Food Sovereignty An international and multidisciplinary team addresses significant ethical questions about the rights to access, manage and interpret the material remains of the past.

Western Civilization, Volume 1 and Perspectives from the Past Welcome to the second edition of Perspectives and Open Access Anthropology! An electronic version of this textbook is available free of charge at the Society for Anthropology in Community Colleges' webpage here: http://perspectives.americananthro.org/

Appropriating the Past
New Perspectives on Deep-water Sandstones

Michael Kammen is a major American historian, whose books have received the Bancroft and Parkman prizes. This book collects his essays on American culture, of which he is one of the major historians.

How Was Life? Volume II

New Perspectives on Well-being and Global Inequality since 1820

Copublished with Editorial de la Universidad del Magdalena

Global Perspectives on Landscapes of Warfare examines the effects of conflict on landscapes and the ways landscapes have shaped social and political boundaries over time. Contributors from different archaeological traditions introduce a variety of methodologies and theories to understand and explain how territories and geographies in antiquity were modified in response to threat. Drawing from eleven case studies from periods ranging over eight thousand years in the Americas, Asia, and Europe, contributors consider how social groups moved and concentrated residences, built infrastructure, invested resources, created alliances and negotiated with human and nonhuman entities for aid, formed and reformed borders, and memorialized sites and territories. Because landscapes of warfare deal with built environments, chapters are presented with rich graphic documentation—detailed maps, site plans, and artifacts—to support the analysis and interpretations. Territories that have been appropriated and transformed by communities at war illustrate how built landscapes not only reflect immediate events but also influence subsequent generations. With a diverse array of case studies and an explicit focus on landscapes, Global Perspectives on Landscapes of Warfare will be of great interest to students and scholars of conflict archaeology and the anthropology and history of violence across the globe. Contributors: Elizabeth Arkush, Viktor A. Borzunov, Igor V. Chechushkov, Tiffany Earley-Spadoni, Nam C. Kim, Lauren Kohut, Takehiko Matsugi, Kerry Nichols, Russell S. Quick, Lizzie Scholtus, James T. Williams

Global Perspectives on Landscapes of Warfare

Wastewater Treatment and Reuse – Present and Future Perspectives in Technological Developments and Management Issues, Volume 5 explores a wide breadth of emerging and state-of-the-art technologies, with chapters in this new release covering In which direction are worldwide regulations for direct reuse of reclaimed water
moving?, A focus on the California experience on the reuse of reclaimed water – Current trends and future perspectives in the regulation, Water scarcity and climate change in the Mediterranean area: is reuse of reclaimed water a strategy to face these problems?, Environmental risks due to the reuse of treated sludge for agricultural purposes, and much more. Covers a wide breadth of emerging and state-of-the-art technologies Includes contributions from an international board of authors Provides a comprehensive set of reviews.

The Western Civilization A storytelling approach that engages students with features to help them master core content, think critically, and make connections.

West Civ 5e Br V1 Pa W/eits Placing value in perspective a rich primary source collection at a truly exceptional value."

Contemporary Perspectives on Ageism Students and instructors alike praise A History of Modern Europe for its authoritative coverage from the Renaissance to the present day. Written in Merriman's signature narrative style, the book is brightened with humor and biographical sketches. The Fourth Edition reflects the latest scholarship while placing special emphasis on the theme of war and society. A new full-color design features a completely redrawn map program and new pedagogical and teaching tools.

The West: A New History In an era defined by daily polls, institutional rankings, and other forms of social quantification, it can be easy to forget that comparison has a long historical lineage. Presenting a range of multidisciplinary perspectives, this volume investigates the concepts and practices of comparison from the early modern period to the present. Each chapter demonstrates how comparison has helped to drive the seemingly irresistible dynamism of the modern world, exploring how comparatively minded assessors determine their units of analysis, the criteria they select or ignore, and just who it is that makes use of these comparisons—and to what ends.
Nostalgia Now During recent years, attempts have been made to move beyond the Eurocentric perspective that characterized the social sciences, especially anthropology, for over 150 years. A debate on the “anthropology of anthropology” was needed, one that would consider other forms of knowledge, modalities of writing, and political and intellectual practices. This volume undertakes that challenge: it is the result of discussions held at the first organized encounter between Iranian, American, and European anthropologists since the Iranian Revolution of 1979. It is considered an important first step in overcoming the dichotomy between “peripheral anthropologies” versus “central anthropologies.” The contributors examine, from a critical perspective, the historical, cultural, and political field in which anthropological research emerged in Iran at the beginning of the twentieth century and in which it continues to develop today.

Transitions and Transformations The best collection of longer primary sources now available in an affordable, compact format.

Entangled Heritages Used by more than a million students since its original publication, Western Civilizations became the leading text for the course by combining historical scholarship with classroom innovation. Master scholars/teachers Joshua Cole and Carol Symes enhance coverage of the West in a global context with a new focus on migration and nationalism. Dynamic digital resources, including award-winning InQuizitive activities and new History Skills Tutorials for every chapter, guide students from basic understanding basics to analysis and interpretation.

In the Past Lane The most pedagogically innovative text and media for the western civilizations course now more current, more global, and more interactive."

New Perspectives on Regulation This open access book provides a comprehensive perspective on the concept of ageism, its origins, the manifestation and consequences of ageism, as well as ways to respond to and research ageism. The book represents a collaborative effort of
researchers from over 20 countries and a variety of disciplines, including, psychology, sociology, gerontology, geriatrics, pharmacology, law, geography, design, engineering, policy and media studies. The contributors have collaborated to produce a truly stimulating and educating book on ageism which brings a clear overview of the state of the art in the field. The book serves as a catalyst to generate research, policy and public interest in the field of ageism and to reconstruct the image of old age and will be of interest to researchers and students in gerontology and geriatrics.

Conceptualizing Iranian Anthropology This beautifully written history recenters the West and rekindles the past in a vivid narrative crafted for beginning students. Grafton and Bell tell the epic story of a West engaged in a continuing search for order across politics, society, and culture, driven by internal tensions and global influences. They deliver the past not as a path to the present but as it was lived at the time, grounded in a balanced, comprehensive, chronological narrative. Combined with rich digital resources to instill practical history skills, The West establishes a dynamic NEW foundation for teaching the Western Civilizations course.

Time Travelers A comprehensive review of the research literature on history education with contributions from international experts The Wiley International Handbook of History Teaching and Learning draws on contributions from an international panel of experts. Their writings explore the growth the field has experienced in the past three decades and offer observations on challenges and opportunities for the future. The contributors represent a wide range of pioneering, established, and promising new scholars with diverse perspectives on history education. Comprehensive in scope, the contributions cover major themes and issues in history education including: policy, research, and societal contexts; conceptual constructs of history education; ideologies, identities, and group experiences in history education; practices and learning; historical literacies: texts, media, and social spaces; and consensus and dissent. This vital resource: Contains original writings by more than 40 scholars from seven countries Identifies major themes and issues shaping history education today Highlights
The Force of Comparison As an experiment in reconnecting academia to the broader democracy, this work is designed to invigorate public policy debate by rededicating academic work to the pursuit of solutions to society's great problems.

Perspectives from the Past: From the age of exploration through contemporary times Silence is a key pedagogical issue in language education. Seen by some as a space for thinking and reflection during the learning process, for others silence represents a threat, inhibiting target language interaction which is so vital during second language acquisition. This book eschews stereotypes and generalisations about why so many learners from East Asia seem either reluctant or unable to speak in English by providing a state-of-the-art account of current research into the complex and ambiguous issue of silence in language education. The innovative research included in this volume focuses on silence both as a barrier to successful learning and as a resource that may in some cases facilitate language acquisition. The book offers a fresh perspective on ways to facilitate classroom interaction while also embracing silence and it touches on key pedagogical concepts such as teacher cognition, the role of task features, classroom interactional approaches, pedagogical intervention and socialisation, willingness to communicate, as well as psychological and sociocultural factors. Each of the book’s chapters include self-reflection and discussion tasks, as well as annotated bibliographies for further reading.

Punctuation in Context - Past and Present Perspectives This book offers both a retrospective view on how theories of aspectuality have developed over the past 30 years, and presents
current, new directions of aspectuality research. The articles in this book take a wide crosslinguistic scope including aspectual analyses of the following languages: English and two varieties of English: African American English and Colloquial Singapore English, Italian, French, Bulgarian, Czech, Mandarin Chinese, West-Greenlandic, Wakashan languages, and Nahk-Daghestanian languages.

Global Perspectives on Global History A storytelling approach that engages students with features to help them master core content, think critically, and make connections.

Perspectives on the Teaching of Geometry for the 21st Century This volume explores the nature of nostalgia as an important emotion in contemporary society and social theory. Situated between the ‘sociology of emotions’ and ‘nostalgia studies’, it considers the reasons for which nostalgia appears to be becoming an increasingly significant and debated emotion in late-modern culture. With chapters offering studies of nostalgia at micro-, meso- and macro-levels of society, it offers insights into the rise to prominence of nostalgia and the attendant consequences. Thematically organised and examining the role of nostalgia on an individual level – in the lives of concrete individuals – as well as analysing its function on a more historical social level as a collective and culturally shared emotion, Nostalgia Now brings together the latest empirical and theoretical work on an important contemporary emotion and proposes new agendas for research. As such, it will appeal to scholars of sociology, social theory, psychology and cultural studies with interests in the emotions.

Perspectives from the Past This volume is a pioneering contribution to the study of food politics and critical agrarian studies, where food sovereignty has emerged as a pivotal concept over the past few decades, with a wide variety of social movements, on-the-ground experiments, and policy innovations flying under its broad banner. Despite its large and growing popularity, the history, theoretical foundations, and political program of food sovereignty have only occasionally received in-depth analysis and critical scrutiny. This collection brings together both longstanding scholars in critical agrarian studies, such as
Philip McMichael, Bina Agarwal, Henry Bernstein, Jan Douwe van der Ploeg, and Marc Edelman, as well as a dynamic roster of early- and mid-career researchers. The ultimate aim is to advance this important frontier of research and organizing, and put food sovereignty on stronger footing as a mobilizing frame, a policy objective, and a plan of action for the human future. This volume was published as part one of the special double issue celebrating the 40th anniversary of the Journal of Peasant Studies.

Western Civilizations The book showcases grammatical, pragmatic, and stylistic functions of punctuation, and shows how punctuation can encode emotion, metalinguistic marking, foregrounding and paralinguistic indications. It also highlights the sensibility of punctuation to genre and the speech-writing continuum, and shows how punctuation conventions change in time.

A History of Modern Europe They reflect on the moral economy of human smuggling and trafficking, the increasing percentage of the world's asylum seekers who escape political violence only by being smuggled, and the implications of human smuggling in a warming world.

The Context of Cognition: Emerging Perspectives This handbook is vital for understanding the origin of deep-water sandstones, emphasizing sandy-mass transport deposits (SMTDs) and bottom-current reworked sands (BCRSs) in petroleum reservoirs. This cutting-edge perspective, a pragmatic alternative to the conventional turbidite concepts, is crucial because the turbidite paradigm is built on a dubious foundation without empirical data on sandy turbidity currents in modern oceans. In the absence of evidence for sandy turbidity currents in natural environments, elegant theoretical models and experimental observations of turbidity currents are irrelevant substitutes for explaining the origin of sandy deposits as "turbidites." In documenting modern and ancient SMTDs (sandy slides, sandy slumps, and sandy debrites) and BCRSs (deposits of thermohaline [contour] currents, wind-driven currents, and tidal currents), the author describes and interprets core and outcrop (1:20 to 1:50 scale) from 35 case studies worldwide (which include 32 petroleum reservoirs), totaling more than 10,000 m
cumulative thickness, carried out during the past 36 years (1974-2010). The book dispels myths about the importance of sea level lowstand and provides much-needed clarity on the triggering of sediment failures by earthquakes, meteorite impacts, tsunamis, and cyclones with implications for the distribution of deep-water sandstone petroleum reservoirs. Promotes pragmatic interpretation of deep-water sands using alternative possibilities Validates the economic importance of SMTDs and BCRS in deep-water exploration and production Rich in empirical data and timely new perspectives

Perspectives on Aspect In recent years, historians across the world have become increasingly interested in transnational and global approaches to the past. However, the debates surrounding this new border-crossing movement have remained limited in scope as theoretical exchanges on the tasks, responsibilities and potentials of global history have been largely confined to national or regional academic communities. In this groundbreaking book, Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows, sociologies of knowledge and hierarchies that are an intrinsic part of historical practice. Taking the United States, Germany and China as his main case studies, he reflects upon the character of different approaches to global history as well as their social, political and cultural contexts. He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue, cooperation and exchange.

Western Civilizations Rapid population aging, once associated with only a select group of modern industrialized nations, has now become a topic of increasing global concern. This volume reframes aging on a global scale by illustrating the multiple ways it is embedded within individual, social, and cultural life courses. It presents a broad range of ethnographic work, introducing a variety of conceptual and methodological approaches to studying life-course transitions in conjunction with broader sociocultural transformations. Through detailed accounts, in such diverse settings as nursing homes in Sri Lanka, a factory in Massachusetts, cemeteries in Japan and clinics in Mexico, the authors explore not simply
our understandings of growing older, but the interweaving of individual maturity and intergenerational relationships, social and economic institutions, and intimate experiences of gender, identity, and the body.

Western Civilizations How was life in 1820, and how has it changed since then? This question, which was at the core of How Was Life? Global Well-being since 1820, published by the OECD in 2014, is addressed by this second volume based on a broader perspective.

Perspectives Catastrophes are on the rise due to climate change, as is their toll in terms of lives and livelihoods as world populations rise and people settle into hazardous places. While disaster response and management are traditionally seen as the domain of the natural and technical sciences, awareness of the importance and role of cultural adaptation is essential. This book catalogues a wide and diverse range of case studies of such disasters and human responses. This serves as inspiration for building culturally sensitive adaptations to present and future calamities, to mitigate their impact, and facilitate recoveries.

Aging From Birth To Death Care-giving is an activity that has been practiced by all human societies. From the earliest societies through to the present, all humans have faced choices regarding how people in positions of dependency are to be treated. As such, care-giving, and the form it takes, is a central experience of being a human and one that is culturally mediated. Archaeology has tended to marginalise the study of care, and debates surrounding our ability to recognise it within the archaeological record have often remained implicit rather than a focus of discussion. These 12 papers examine the topic of care in past societies and specifically how we might recognise the provision of care in archaeological contexts and to open up an inter-disciplinary conversation, including historical, bioarchaeological, faunal and philosophical perspectives. The topic of ‘care’ is examined through three different strands: the provision of care throughout the life course, namely that provided to the youngest and oldest members of a society; care-giving and attitudes towards impairment and disability in prehistoric and historic contexts, and the role of
animals as both recipients of care and as tools for its provision.

**East Asian Perspectives on Silence in English Language Education**

Relying on the concept of a shared history, this book argues that we can speak of a shared heritage that is common in terms of the basic grammar of heritage and articulated histories, but divided alongside the basic difference between colonizers and colonized. This problematic is also evident in contemporary uses of the past. The last decades were crucial to the emergence of new debates: subcultures, new identities, hidden voices and multicultural discourse as a kind of new hegemonic platform also involving concepts of heritage and/or memory. Thereby we can observe a proliferation of heritage agents, especially beyond the scope of the nation state. This volume gets beyond a container vision of heritage that seeks to construct a diachronical continuity in a given territory. Instead, authors point out the relational character of heritage focusing on transnational and translocal flows and interchanges of ideas, concepts, and practices, as well as on the creation of contact zones where the meaning of heritage is negotiated and contested. Exploring the relevance of the politics of heritage and the uses of memory in the consolidation of these nation states, as well as in the current disputes over resistances, hidden memories, undermined pasts, or the politics of nostalgia, this book seeks to seize the local/global dimensions around heritage.
